## **BONDTECH ELLE MODELLING LATEX**

### **TECHNICAL DATA SHEET**

#### **DESCRIPTION & USES:**

A self-vulcanising latex of medium viscosity.

#### **METHOD OF APPLICATION:**

Elle modelling latex is suitable for the production of latex rubber mouldings from plaster cast models. The set film of latex can be easily stripped from the castings after drying. A thicker film can be obtained by applying more than one coat of the material.

#### **PROPERTIES:**

- Appearance                      White thick liquid
- Curing Time                      20 min @ 110°C
- Drying Time                      4 hours @ 25°C

#### **STORAGE:**

Stored in a sealed container Elle modelling latex will keep satisfactorily for approximately 6 months at normal room temperature. Contamination with copper alloys must be avoided at all stages of storage and use.

**Note: Additional information on physical properties, health hazards, storage, handling and transport is available in the Material Safety Data Sheet (MSDS).**
